

Nextiva vFAX

Never miss another fax when it's in the cloud

Overview

Nextiva vFAX is the most sophisticated and reliable virtual faxing platform for today's businesses. Gone are the days of worrying about missing a fax due to your fax machine being jammed, out of paper, or busy. You're no longer restricted to sending faxes from your office fax machine; you now have the option to send faxes securely via your email or vFAX online portal. A variety of file types are accepted, including images (TIFF, GIF, etc.), Adobe Acrobat (PDF), Microsoft Office, printer and text file formats.

Benefits

Nextiva vFAX enables a new level of flexibility and mobility that will change the way your business operates.

- **Always On, Never Busy** – No dialing means no busy signal, we send faxes over the Internet and store every fax.
- **Access Fax Anywhere** – Your faxes are stored electronically and emailed to you, so you can access them online from anywhere.
- **No Computer Required** – Even if you are away from your computer or it is turned off, vFAX delivers. You won't miss a fax again.
- **Fax Machine Support** – Using our easy Fax Adapter, you can use your current fax machine to send paper fax messages.
- **Toll-Free Number** – Your customers will never pay long distance fees when sending you a fax.

Summary

Nextiva vFAX allows you to send and receive faxes securely from anywhere. No longer held back by your office fax machine, you can conduct business on the go. Nextiva vFAX allows you to be more productive and never miss or lose a fax again.

Features

- **Online Portal** – Send and receive faxes. Check your account activity, status, or retrieve back-up, with the vFAX online portal.
- **Fax by Email** - Send a fax quickly via email by attaching a file, just as you would to send an email.
- **Fax with a Mobile Device** - Send and receive faxes instantly with your mobile phone using the email function.
- **Multiple Recipients** - Send a single fax to up to six recipients at one time.

Security

- **256 Bit SSL Encryption** - Twice the standard level of Secure Socket Layer encryption, the vFAX portal keeps your sensitive information secure.
- **Triple Redundancy** - Carrier-class, maximum-security data centers that are geographically protected from natural disasters provide 99.999% uptime.
- **Password Protection** - Only authorized users, with the correct login credentials, can access your faxes in the portal.
